BLASTERS ✓ **CERTIFIED**

T3 Series

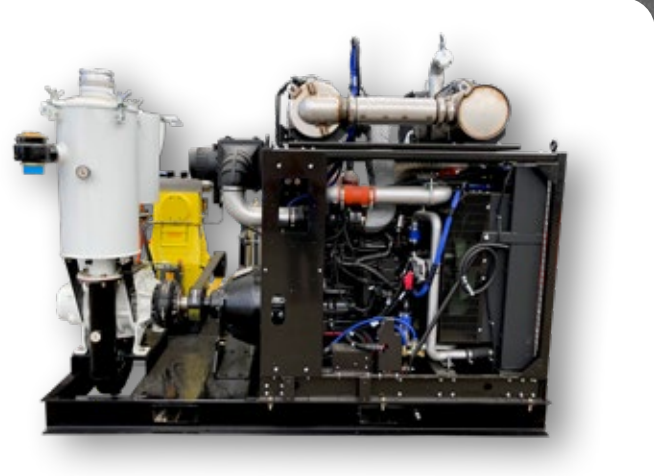

Our exclusive series of water blasters incorporating the newest technology with proven engineering. New, zero hour, John Deere Tier 3 diesel engines paired with the pump of your choice. With custom paint options and several other unique characteristics, this equipment will be a reflection of your company's commitment to excellence.

Innovative Series

Built with over 45 years of experience in the industry, this proven line of water blasters delivers certified, refurbished equipment to meet certain requirements but deliver beyond expectations. Still offering several choices of engines and pumps, this product line has the feel of custom but not the expense.

Custom Equipment

When something off the shelf doesn't work, we can design and build equipment to meet your project's needs and specifications. Our belief in keeping it simple is on display when you speak to our team of experts. Understanding and incorporating technology is important but so is completing the project on time and within budget.

WORLDWIDE DISTRIBUTOR OF WATERBLASTING PARTS

- | | | |
|-------------|------------------|------------|
| Hoses | Foot Pedals | Pump Parts |
| Flex Lances | Rotating Nozzles | Components |

- Works with all UHP water blast pumping systems
- Flow rates up to 13 gpm
- Dry shut off system
- Easy setup, compact design
- 12 volt operated hydraulic valve
- Field repairable in minutes

THE CERTIFIED ADVANTAGE

Our Certified program gives you the customer, complete confidence in the quality of the product. Every water blaster is inspected and reconditioned by authorized trained technicians. All Pre-Owned water blasters must go through a strict evaluation and meet our premium standards to earn the Certified title.

A PRODUCT OF: **BLASTERS, INC.**

BLASTERS, INC.

Blasters, Inc. was founded in 1975 by Chairman and CEO, Frederick A. Boos and is headquartered in Tampa, Florida. Our management team has well over 100 years of water blasting experience and is led by President Scott F. Boos. Our extensive knowledge of the water blasting industry gives us the expertise to handle any job using pressures from 5,000PSI to 40,000PSI, combined with the correct gallon per limit (GPM) then engineered to the proper tooling to effectively complete projects.
